MINT-Teriflunomide Patient Card

This Patient Card contains important safety information you need to be aware of when receiving treatment with Mint-Teriflunomide. Please refer to the Patient and Caregiver Guide for complete information, which can be found by calling 1-877-398-9696 or visiting mint-teriflunomide.com.

Please show this card to any doctor or healthcare professional involved in your medical care (e.g., in case of an emergency).

For further information, please contact Drug Safety at

drugsafety@mintpharma.com

Patient name: _____

Date Mint-Teriflunomide first prescribed: _____

Clinic name: _____

Treating physician phone number: _____

For female patients, including girls and adolescents and their parents/caregivers:

- Do not start Mint-Teriflunomide if you are pregnant, or you think you may be pregnant. Your doctor should administer a pregnancy test before you start taking MINT-Teriflunomide to make sure.
- You must use effective contraception while and after using teriflunomide.
- Your doctor will provide counselling on the potential risks of teriflunomide to an unborn baby and on the need for effective contraception and will discuss starting its use.
- Contact your doctor if you want to change contraception method or if you are planning to become pregnant.
- If you become pregnant, are late starting your period or have any reason to suspect pregnancy while taking Mint-Teriflunomide or within 2 years after stopping it, tell your doctor right away.
- In the event of a pregnancy, please contact the Teriflunomide Enhanced Pharmacovigilance Pregnancy Active Surveillance Program at 1-877-398-9696 or email us at drugsafety@mintpharma.com. The purpose of an Enhanced Pregnancy Surveillance Program is to provide data on the effect of Mint-Teriflunomide exposure during pregnancy.
- In case of pregnancy, your doctor may suggest treatment with certain medicines to speed up the removal of teriflunomide from your body.
- You should also discuss with your doctor if you plan to or are breastfeeding.
